Projects

Travel Listing Web Application **August 2025–September 2025**

Developed a full-stack Travel Listing Web Application that allows users to explore travel destinations and view detailed information dynamically. The application supports CRUD operations for managing listings, ensuring efficient data handling and real-time updates. Implemented a responsive and user-friendly interface using EJS and Bootstrap for improved accessibility across devices. Integrated MongoDB for secure and structured data storage with Express.js handling backend logic. The project strengthened my understanding of full-stack development.
